## Summary

Trainee Software Engineer specializing in IBM Integration technologies (IBM ACE/IIB, IBM MQ) and ServiceNow. Skilled in ESQL programming, API integrations, and ServiceNow scripting. Experienced in developing cross-platform mobile and desktop applications using Flutter. Actively building expertise in enterprise integrations and scalable application development.

## Skills

**Languages :** Java, Dart, Python, ESQL  
**Database :** SQL, ESQL, ODBC CRUD  
**API :** SOAP, REST, JSON/XML

**IBM Integration :** IBM ACE (IIB), IBM MQ  
**ServiceNow :** GlideRecord, Script Includes, CMDB  
**App Dev :** Flutter, SQLite

## Experience

### Eidiko Systems Integrators

Aug 2024 – Present

#### IBM App Connect Enterprise Developer

##### Client: Steward Bank, Zimbabwe

- Tools: IBM App Connect, HTTP, SOAP, GitHub, ODBC, SQL, Postman
- Built integration flows using IBM App Connect Enterprise 12 to connect enterprise systems, transform data, and streamline business operations.
- Implemented routing, validation, and error handling with custom logs for reliable messaging.
- Developed support for multiple data formats (XML, JSON, CSV) and documented integration solutions.

##### Client: Deshan Bank, Ethiopia

- Tools: IBM ACE, REST APIs, SOAP, Swagger, ODBC, Postman
- Developed REST APIs and message transformations (JSON-SOAP) to integrate systems across platforms.
- Wrote ESQL functions for database interactions and Java-based encryption for secure data exchange.
- Conducted application testing, requirement analysis, and designed both synchronous and asynchronous messaging.

## Projects

### PG Management Mobile App

2025

- Developing a mobile application using Flutter for managing hostel and PG operations.
- Features include resident management, payment tracking, document storage, and reporting.
- Designing a multi-tenant architecture to support multiple PGs with customizable configurations.
- Implementing role-based access control, localization, and modular workflows for scalability.
- Planned backend migration to Spring Boot for improved performance and API integrations.

### Windows Billing System

2025

- Built a Windows-based billing and inventory management application using Flutter.
- Designed a relational database schema in SQLite to manage products, billing records, and associated items.
- Implemented inventory management with full CRUD functionality and automated invoice number generation.
- Integrated PDF generation and file sharing for generating and exporting invoices.
- Structured the codebase for maintainability with clear separation between database logic and UI components.
- Added features such as product categorization, GST details, and vehicle information for enhanced billing records.

## Education

### Bachelor of Engineering (Electronics & Telecommunication)

2020 – 2024

TSSM's Bhivarabai Sawant College of Engineering & Research, Pune

### Higher Secondary Certificate (Science)

2019 – 2020

Shankarrao Mohite Mahavidyalaya, Akluj

### Secondary School Certificate (SSC)

2017 – 2018

Jijamata Shikshan Prasarak Mandal, Sarati

## Certifications

- IBM Integration Bus - Developer Track (Badge)
- ServiceNow Fundamentals
- Java by core2web
- Flutter by incubators
